

An Evening of Transportation Options for Underhill and Surrounding Community Residents

The Underhill Alternative Transportation Committee is sponsoring a presentation and discussion of transportation options for local citizens including both normal, everyday commuting and personal needs as well as the special challenges of transportation as we age in our communities. While this discussion is being sponsored by Underhill, we recognize that our neighbors in Jericho and Cambridge and perhaps beyond share many of the same concerns for transportation and invite them to attend and participate.

Date: January 11, 2018

Time: 6:30 PM

**Where: Underhill Town Hall, Pleasant Valley Rd, Underhill
Center**

**Who: Sandy Thibault, Executive Director, Chittenden Area
Transportation Management Association (CATMA)
Jeanne Hutchins, Mount Mansfield Village Community
Underhill Alternative Transportation Committee.**

Light refreshments provided

CATMA is a non-profit, membership based, Transportation Management Association (TMA) serving Chittenden County. They administer and manage customized, Transportation Demand Management (TDM) programs for local employers and institutions that achieve easier, more economical commutes, reduce parking challenges and congestion, and reduce polluting emissions. Although they do not operate transit services, they maintain strong partnerships with local transit organizations and will assist patrons in accessing them.

Mount Mansfield Village Community is a locally initiated "village model" designed to assist older residents who choose to "age in place" by providing and/or linking them to services that would create a safe, and supportive environment within their existing homes and communities. For more information go to the Village Network website at www.vtvnetwork.org.
